Sustainable Restaurant Supplies

TRUST

We are excited to work with you and strive to build trust and reputation by providing you with the client support you need to be successful.

QUALITY

We take pride in the quality of our products and source them from certified FSC manufacturers.. We are committed to sustainable practices as an FSC certified company.

CARE

We care about the experience of the end consumer and our partnership. We strive to build a mutually beneficial long term partnership with your company.

COMPOSTABLE TAKE-OUT RESTAURANT SUPPLIES

Take out service allows you to generate a revenue stream without the barriers of capacity limitations that dine-in service imposes. Creating a great user experience is critical to growing your business. Providing eco friendly, biodegradable packaging and tableware signals to your guests that you care about the environment.

ABOUT BAMBOO

Bamboo is the world's most renewable, biodegradable material and is the best replacement for many plastic products in the market.

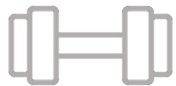

100% biodegradable

Requires 30% less water than tree

Requires no pesticides to grow

Tensile strength

Grows 24 - 30 inches per hour

BAMBOO PULP PROPERTIES

Through its patented process, bamboo pulp containers have the same functional characteristics as those of plastic and styrofoam containers except that they are biodegradable

PFAS Free (per- and polyfluoroalkyl substances)

Microwave, freezer and oven safe

Water, oil and heat resistant

BAMBOO PULP FOOD CONTAINERS

Biodegradable bamboo containers are made of bamboo pulp fibres. They are organic, water and heat resistant and retain the original food temperature for hours.

Single Compartment with lid

2 Compartment with lid

3 Compartment with lid

4 Compartment with lid

5 Compartment with lid

ABOUT BAMBOO PULP CONTAINERS

Bamboo containers are made with bamboo pulp. Bamboo vulgaris is the species of bamboo typically used for food containers, home construction, boats, huts, fences, furniture and more. The stalks are shredded, digested and treated to convert into pulp and then molded to be used as containers.

Bamboo pulp is 100% biodegradable and organic without bleach

Container lids have a T-lock system to reduce spills and to retain food temperature

Compartment separation is sturdy and keeps dry and liquid food separate

BAMBOO FIBRE PROPERTIES

Bamboo cutlery and tableware are eco friendly alternatives to plastics. As plastics are banned from daily use, restaurants need an alternative for their take away service package.

BPA free and compostable

Smooth fibres, no splinters

Sturdy, lightweight

ABOUT US

EcoLuxe envisions a world driven by the circular economy where every product we consume has its beginning and end of life in nature.

We believe that sustainable products are the future. By replacing plastics in our homes and our businesses, we can minimize the harmful effects that non-biodegradable products will have on our environment.

The mark of
responsible forestry

FSC® N003940

We partner with businesses to make sustainable products more accessible. We hope businesses will work with us to offer customers a better assortment of biodegradable, eco friendly products so consumers have more sustainable choices.
